Angular-and-beyond

DayOneSquare

Summary: *This document is the subject for the DayOneSquare module of the Angular-and-beyond written by bvalaria.*

Version: 1.0

Contents

Chapter I

Instructions

- Only this page will serve as reference: do not trust rumors.

- Make sure you have the appropriate permissions on your files and directories.

- You have to follow the submission procedures for all your exercises.

- Your exercises will be checked and graded by your fellow classmates.

- These exercises are carefully laid out by order of difficulty - from the easiest to the hardest. We `will not` take into account a successfully completed harder exercise if an easier one is not perfectly functional.

- Using a forbidden function is considered cheating. Cheaters get `-42`, and this grade is non-negotiable.

- If your program doesn't compile, you'll get `0`.

- You cannot leave any additional file in your directory than those specified in the subject.

- Got a question? Ask your peer on the right. Otherwise, try your peer on the left.

- Your reference guide is called `Google / man / the Internet / ...`.

- How to solve this problem? Try this:
  "how to + ${problem} + ${ProgramLangName}" and search on google.
  Example: "How to center a DIV html" / "How to catch text in a form JS"

- Examine the examples thoroughly. They could very well call for details that are not explicitly mentioned in the subject...

- By Odin, by Thor ! Use your brain !!!

Chapter II

Foreword

Dirty Diana - Michael Jackson

```
Oh, no

You'll never make me stay
So take your weight off of me
I know your every move
So won't you just let me be
I've been here times before
But I was too blind to see
That you seduce every man
This time you won't seduce me

She's saying, "That's okay
Hey, baby, do what you please
I have the stuff that you want
I am the thing that you need
She looked me deep in the eyes
She touchin' me so to start
She says there's no turnin' back"
She trapped me in her heart

Dirty Diana, nah
Dirty Diana, nah
Dirty Diana, no
Dirty Diana
Let me be

Oh, no
Oh, no
Oh, no

She likes the boys in the bands
She knows when they come to town
Every musician's fan, after the curtain comes down
She waits at backstage doors, for those who have prestige
```

```
Who promise fortune and fame, a life that's so carefree

She's saying, "That's okay
Hey, baby, do what you want
I'll be your night lovin' thing
I'll be the freak you can taunt
I don't care what you say
I wanna go too far
I'll be your everything
If you make me a star"

Dirty Diana, nah
Dirty Diana, no
Dirty Diana

Diana
Diana
Dirty Diana
It's Dia-aa-aa... come on

She said, "I have to go home
'Cause I'm real tired you see
Now I hate sleepin' alone
Why don't you come with me?"
I said, "My baby's at home
She's probably worried tonight
I didn't call on the phone
To say that I'm alright"

Diana walked up to me
She said, "I'm all yours tonight"
And then I ran to the phone
Sayin', "Baby I'm alright"
I said, "But unlock the door"
'Cause I forgot the key
She said, "He's not coming back
Because he's sleeping with me"

Dirty Diana, nah
Dirty Diana, no
Dirty Diana, nah
Dirty Diana

Come on!
Come on!
Come on!
Come on!
```

It's just a song lyric, don't worry

Chapter III

Exercise 00 : Monday

	Exercise - It doesn't matter
	Monday
Turn-in directory : $ex-Itdoesn'tmatter/$	
Files to turn in : `It doesn't matter`	
Allowed functions : `Google`	

Hey there, did you think I had learned so much in the last week?

Silly. Here comes the good stuff now.

Welcome to Angular Park!

How to set up a project in Angular? Blessed documentation. Set up your development environment nicely and create your first project in Angular. It basically creates everything for you, but you must give the commands and figure it out.

- What is Angular?

- What is a framework?

- Differences between Angular and React?

- How is an Angular project structured?

- What is MVC?

- What is single-page application framework?

- How do you create an Angular project? What about the components?

- What is inside the app.module.ts file?

- What is Routing in Angular?

Study the whole world of Angular, during the fix there will be questions, simple but very important. While you're at it also review what you've done in the past few days, you'll need it. During the evaluation you will be asked to create a new project from the terminal.

You don't have to push any folder.

Chapter IV

Submission and peer-evaluation

Turn in your assignment in your `Git` repository as usual. Only the work inside your repository will be evaluated during the defense. Don't hesitate to double check the names of your files to ensure they are correct.

> ⚠️ You need to return only the files requested by the subject of this project.
